

Is your child 8-12? Do they have a diagnosis of autism spectrum disorder?

Participation involves 4 sessions, each lasting up to 2 hours:

- 1 virtual session with parent
- 1 virtual session with child
- 2 MRI sessions at the Maryland Neuroimaging Center (MNC)

- During the virtual session, your child will play games and watch some videos with a research assistant. The games involve activities such as hearing stories about characters and deciding what they would or should do next.
- During your visits to the MNC, your child will play games while lying inside an MRI scanner.
- You will be compensated monetarily for your time and after the MRI session, your child will also get to pick out a toy prize!
- All of our staff have been trained for ensuring coronavirus precautions are strictly upheld.
- You will be provided more information during the screening call.

Interested in participating or hearing more about the study? Use your phone to scan our QR code below and fill out our parent interest form. Our research assistants will contact you shortly!

- ☐ Your child may be eligible to participate in a study at the University of Maryland, College Park!
- ☐ Children will watch movies, play games, and tell us what they think!
- ☐ **Compensation and prize for participation**
- ☐ Weekday and weekend appointments available
- ☐ Free parking provided
- ☐ Educational, interesting and fun!
